

Geography
Year 6 Farm and Factories Global Trade

Concepts
Locational Knowledge Physical Geography

Prior Learning	New Learning	Future Learning
<p>Identify the UK's global links</p> <p>Understand the different climate zones of the world (tropical, temperate, polar), including the significance of the Tropics of Cancer and Capricorn, the Equator and the polar regions.</p> <p>Understand the basic process of global warming, its causes, implications and changes required.</p> <p>Identify and study the different climatic regions of UK and Europe.</p>	<p>Use physical and political maps, atlases, globes, Google Maps and Google Earth to locate and describe major imports and exports, including those of the UK.</p> <p>Understand fairtrade.</p> <p>Understand global supply chains.</p> <p>Understand highest value exports.</p> <p>Understand how food production is influenced by climate and biomes.</p>	<p>Understand, through the use of detailed place-based exemplars at a variety of scales, the key processes in:</p> <p>Physical geography relating to: geological timescales and plate tectonics; rocks, weathering and soils; weather and climate, including the change in climate from the Ice Age to the present; and glaciation, hydrology and coasts</p> <p>Human geography relating to: population and urbanisation; international development; economic activity in the primary, secondary, tertiary and quaternary sectors; and the use of natural resources</p> <p>Understand how human and physical processes interact to influence, and change landscapes, environments and the climate; and how human activity relies on effective functioning of natural systems</p>

Sequence of Learning	Current Vocabulary	New Vocabulary
<p>The Geography of Food How food is produced, processed, distributed and consumed How food production, processing and distribution has changed over time</p> <p>The Distance Food Travels How far does food travel What are the consequences of food miles</p> <p>Food and Climate Change How climate affects food production Causes of climate change Reducing the carbon footprint of food production</p> <p>Global Trade Imports and exports</p> <p>Supermarkets and Global Supply Chain</p> <p>Global Transportation</p>	<p>Biomes</p> <p>Global pattern</p> <p>Climate</p> <p>Climate zones</p> <p>Solar energy</p> <p>Equator</p> <p>Pole</p> <p>Latitude</p> <p>Temperature</p> <p>Location</p> <p>International</p>	<p>Food production</p> <p>Processing</p> <p>Distributing</p> <p>Retailers</p> <p>Commercially</p> <p>Place of origin</p> <p>Imported</p> <p>Greenhouse emissions</p> <p>Carbon footprint</p> <p>Exported</p>

Trip/Visitor
Trip to Cadbury's World—How cocoa is grown and the processes in manufacturing chocolate
